NEW YORK MILLIONAIRES. Good Squares.

Writing in the 'Fitzroy Journal,' Mr. ... writes a striking picture of the nervousness of New York millionaires.

Our first impression is that the millionaires are not so much interested in their money as we thought they were.

It is not the money that interests them, but the power that it gives them.

They are not interested in the money itself, but in the influence it gives them.

KITCHEN & FLOWER GARDEN

Practical Hints.

(By Thomas Lamb & Co., Horticulturists & Seedsmen, 125 Bourke-st., Melbourne.)

CALENDAR OF OPERATIONS FOR MARCH.

The exceptionally dry weather of January and February was such that garden operations were practically at a standstill, except where water for irrigation was available.

Let us now say a few words about the operations to be carried out in the garden during the month of March.

Barley and Tares should be sown largely for green feed, the seed being sown 2 inches deep, broadcast.

Gardeners find a great difficulty in getting the young plants which are sown in the open ground to grow.

Now, all our mortal cares here upon this earth are to get rid of the weeds which are so much more numerous than the plants which we wish to grow.

It is a well known fact that the soil is the most important element in the production of a crop.

When the ground is to be prepared for the sowing of a crop, it is necessary to have the soil in a fine state of tilth.
